

WILLIAM GLICKMAN

FULL-STACK & AGENTIC AI ENGINEER

willglickman@gmail.com | 516-639-9257 | wglickman.com | linkedin.com/in/william-glickman | github.com/wglickman33

PROFILE

Full-stack software engineer and agentic AI engineer specializing in LLM-powered conversational systems, with a neuroscience research background applied directly to healthcare AI. Currently build and evaluate production AI voice and chat agents for behavioral health admissions at Further Technologies, and independently architect and operate a full-stack e-commerce platform as co-founder and CTO of My Kosher Delivery. Strong track record shipping secure, scalable systems end-to-end: architecture, backend, frontend, and testing infrastructure.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Vite, HTML5, CSS/SCSS, Material UI (MUI), Recharts, Responsive Web Design

Backend: Node.js, Express.js, Flask, REST & Custom APIs, JWT Authentication, RBAC, Webhooks, Google Maps API

Data & Cloud: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Supabase, Sequelize ORM, Celery, Heroku, Netlify, CI/CD

AI Engineering: Agentic AI, Generative AI, Prompt Engineering, OpenAI / Anthropic / Google Gemini APIs, Voice AI (ElevenLabs, Cekura), Langfuse

Tools & Practices: Git, GitFlow, Agile/Scrum, Postman, Bruno, Notion, Figma, Datadog, Metabase, ngrok, Squarespace

EXPERIENCE

Agentic AI Software Engineer | Further Technologies

Jun 2025 – Present

New York, NY (Remote)

- Joined as sole engineer on the Behavioral Health team (grew to 4 engineers plus a manager); redesigned a static AI prompt into a dynamic, injectable architecture powering 4 facility-typed AI voice and chat admissions agents (substance use, mental health, eating disorder, outpatient) with crisis escalation, live transfer, and scheduling logic.
- Designed a separate AI training product simulating prospective callers for staff practice, authoring the foundational persona templates used team-wide, and contributed to parallel SMS agent variants across all facility types.
- Built an LLM evaluation framework from scratch in Langfuse (automated routing, multi-turn tool-use simulation, LLM-as-judge scoring, reporting), enabling production-faithful regression testing across every channel and facility type.

Co-Founder & CTO | My Kosher Delivery

Feb 2025 – Present

New York, NY (Remote)

- Co-founded and lead all engineering for a full-stack e-commerce platform delivering kosher Shabbos meals across the Five Towns, NYC, NJ, and the Hamptons, partnering with 11 restaurants and a dedicated B2B nursing-home vertical.
- Architected the complete stack (React/Vite, Node.js/Express, PostgreSQL/Sequelize) deployed on Netlify and Heroku; built JWT authentication with role-based access control across 4 user types and Stripe payments with server-side order validation.
- Designed a multi-vendor cart and checkout system with zone-based delivery logic and a full admin analytics dashboard; integrated Shipday, Mailchimp, and Cloudinary, with real-time order updates via Server-Sent Events.

Full-Stack Developer | BG Workspace Solutions

Aug 2023 – Present

New York, NY (Remote)

- Build and maintain a ReactJS/Javascript/SCSS web application for a B2B office furniture company, connecting businesses with premium furniture manufacturers to streamline commercial workspace procurement.
- Own ongoing feature development, UI updates, and client-facing functionality as the company's sole engineer.

Junior AI Engineer | Quant Inc

Nov 2024 – May 2025

New York, NY (Onsite)

- Designed agentic AI systems integrating GPT-4, Flask, Redis, OpenSearch, and Ansible, cutting IT incident resolution time by over 70%.
- Developed an end-to-end AI automation pipeline enabling real-time IT issue diagnosis and self-healing infrastructure; engineered AI-driven DevOps workflows that boosted automation and remediation efficiency by 4.8x.

Chief of Staff | Aviato Drone & Code

Jul 2023 – Jun 2025

New York, NY (Hybrid)

- Built 7 JavaScript-based drone control curricula and led hiring, training, and performance management for a 15-person team, expanding the customer base by 300%.

EDUCATION

BrainStation | Diploma, Software Engineering; Certificate, User Interface Design

Jul 2024 – Feb 2025

Binghamton University | B.S., Integrative Neuroscience

Aug 2020 – Aug 2023
